CEO's STATEMENT

Dear Shareholders,

I must start by saying that we have come a long way during the year and the performance of the Company bears testimony to that.

During the year ISMT Ltd brought together and consolidated the capabilities both in terms of processes and people - that existed in the erstwhile The Indian Seamless Metal Tubes Ltd. and Indian Seamless Steels & Alloys Ltd. We were able to reposition ourselves as an integrated precision seamless tube manufacturer and further improve our services to the specialized seamless tube as well as alloy steel customers.

Our growth driver is international business. Our exports increased by 40 percent in the year to approximately USD 45 million and it is expected to further grow by about 40 percent in the year 2006-07. It is planned that in the next five years about 50 percent of our tube production would be exported to some of the most discerning markets of the world.

We have embarked upon an expansion plan and this would result in our capacity for seamless tubes increasing from the current level of 155,000 to 475,000 MTPA and the investment required for this would be about Rs 250 Crore. To support this level of seamless tube production, the steel capacity would also be increased incrementally from the existing 250,000 to 500,000 MTPA. The increase in the capacity of seamless tubes should be in place by the last quarter of FY 2007-08. The drivers for this increase in capacity is the anticipated growth in demand from the power, bearing and automobile sectors in the domestic market.

All the pre-implementation activities for the project have been completed and work at the Baramati Unit, the place where the new finishing mill would be commissioned will start soon. The expansion is expected to improve our competitiveness through improved material utilization and reduced process cost. We expect to reach the optimal level of utilization within three years of the commissioning of the new mill.

To become one of the leading specialized seamless tube manufacturers in the world we have to move faster than global competitors and this can happen only if we scale up our capacities and continuously improve our efficiencies in all our business processes. We also have to imbibe an operating culture where we are on a constant lookout for better ideas, are willing to experiment and take risks and where we value our commitments to both internal and external customers.

I must mention here that our knowledge capital is absolutely unparalleled it is this knowledge capital along with our commitment to teamwork that would take us to our next milestone — ***to be one of the largest integrated specialized seamless tube manufacturing companies in the world.***

I am glad to mention that your Company increased its turnover by 19 percent to Rs 1061 Crore and exports accounted for 20 percent of the turnover. The Net Profit has reached the healthy level of 11 percent of turnover (Rs 115 Crore). Given the fact that the macro-economic parameters are likely to remain robust, the market for our products should continue to grow and the Company should further improve its operating performance and increase profits in the years to come.

Your Company is targeting aggressive growth based on increased international exposure as well as higher penetration in the domestic market. A comprehensive strategic package has been developed to make this happen and the management is confident that we should get very close to realizing the vision that we have set for ourselves ***“to be the most sought after, efficient, profitable and respected producer globally of seamless tubes and alloy steels”.***

I take this opportunity to express my gratitude to our Customers, Banks, Financial Institutions, Business Associates and Shareholders for their continued support.

Thank you.

MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY STRUCTURE AND DEVELOPMENTS

The sustained economic growth led to robust demand for seamless tubes in the country which together with the export growth resulted in 35% growth in Tube Sales. The performance for the year was thus considerably better as under :

The improvement in performance during 2005-06 can be attributed to the following major initiatives:

- 1) Baramati Unit which turned around last year was the largest contributor to revenue and profit growth among the three units.
- 2) Continued growth in exports with emphasis on extending the reach in terms of customer, products and geographic segments.
- 3) Increasing shift in product mix towards high value items.
- 4) Increase in Tube sales as percentage of total sales.
- 5) Cost efficiencies arising from improved utilisation as also conscious cost reduction measures undertaken by the Company.

OPPORTUNITIES AND THREATS

Seamless Tubes consumption is aligned to economic growth and 7% growth recorded by the economy for 3 consecutive years has meant accelerating demand for tubes. In particular, the investments under way in both Construction and Power sector has created a large market for seamless tubes. On the international front, increasing customers base, buoyancy in U.S. Economy and under exploited European market present a large pool of opportunity. Your Company, with its global competitive strengths, is suitably placed to exploit this opportunity.

The Company's focus on continuous improvement in quality and delivery, large range of product offering, and the widespread geographical spread not only insulates it against 'competitor aggression' but also makes it possible to improve its penetration on a sustained basis. The expansion in capacity would result in improved economies of scale & further bring down the cost of production. This would enable the Company to retain and improve market share even under suppressed and price competitive market conditions.

SEGMENT / PRODUCT INFORMATION

The external steel sales came down from 53% to 47% of total steel sales.

Particulars	Rs. in Crore		
	2005-06	2004-05	% increase

- Captive	417.00	337.98	23%
- External	367.08	381.83	-4%

Particulars	Rs. in Crore		
	2005-06	2004-05	% increase

- Tube	693.96	510.42	36%
- Steel	367.08	381.83	-4%

Cold finished tube being high end seamless tubes in terms of price and margins was a thrust area and the sales of such tubes went up to 33% of total tubes sales against 23% of sales during Previous Year.

OUTLOOK

Given the strong market, the Company has reason to be optimistic about its prospects during 2006-07. Going forward, the expansion project will drive and transform the business of the Company. The prices of inputs continue to be volatile and the Company pursues the strategy of either linking the sale price to international scrap prices or entering into shorter delivery orders.

RISKS AND CONCERNS

The improved financial position has considerably reduced risks in respect of liquidity and leverage. Foreign exchange, input cost volatility, taxation, interest rates, natural and man made disasters and political risks are some of the general risks to which your Company is also exposed.

INTERNAL CONTROL SYSTEMS

The Company has established a strong Internal Audit system which is supported by controls at various operating levels. Internal Audit carries out ongoing examination of the efficacy of internal control systems.

FINANCIAL PERFORMANCE

The year was notable for the fact that the Company has for the first time crossed turnover of Rs.1000 Crore and profit of Rs.100 Crore. This has led to the Company emerging as a strong financial entity.
